

The MEDIATOR lock in its tubular frame version is available with different backsets and a comprehensive range of accessories.

#### Overview of Advantages

- Automatic locking system: Bolt and latch are blocked, therefore higher level of security
- Mechanical follow up control between double action latch and control latch
- Integrated panic function via internal door handle
- Alternative function for unlocking with key from outside
- Minimum rear backset for tubular frame design: 15 mm

#### Scope of delivery

- 1 piece lock
- 1 reducer
